

# HOSE TEST BENCH

CUSTOMISABLE TO SUIT ANY APPLICATION

Nessco Pressure Systems is pleased to supply three models of our unique hose test bench, which have been based on standard industry requirements. Each model can be customised to meet volume and pressure specifications, allowing hose testing from anywhere between 500 and 40,000 psi.

All Nessco Pressure Systems hose test benches comply with high pressure testing industry standards, and are available in customised models and sizes to suit any application.

## Features

- ✓ Three standard size variations available:
  - Mod 10
  - Mod 20; and
  - Mod 50
- ✓ Customer specified models available upon request
- ✓ Benches can be tailored to suit individual volume and pressure requirements
- ✓ Additional features available upon request, and may include:
  - chart recorders
  - digital data acquisition units with report print-out facilities
  - fill pump
- ✓ Hose testing capabilities from 500 - 40,000 psi
- ✓ Viewing window of 10mm polycarbonate
- ✓ Test fluid: water or oil
