

PLUS SERIES

Reliable, innovative industrial air compressors built to perform

MADE IN ITALY

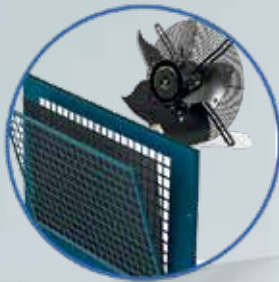

COMPACT AIREND 'ALL IN ONE'

Equipped with wear resistant bearings and made of highly sophisticated machined components, these airends have an extremely low induced-rotation noise and a very limited maintenance cost.

POWER TRANSMISSION SYSTEM

The motor support system was designed to prevent stressing of the rotating parts. This transmission system assures low induced-rotation.

PRE-FILTER AND VENTILATION

The high-flow electric fan with low-induced noise level conveys all the airflow in a single point, maintaining the correct thermal balance to all internal components.

"YOUR EVERYDAY COMPRESSED AIR SOLUTION"

The Venti compressor is a European designed and manufactured compressor, supported locally by a 3 year warranty.

This combination of support and quality offers complete peace of mind when selecting a Venti compressor.

The unique all-in-one design offers simple installation, coupled with energy saving features and low noise levels.

Fields of Application

- Spray painting
- Plasma cutting
- Sandblasting
- Carpentry
- Vehicle workshops
- Engineering workshops

ENERGY SAVING ELECTRONIC CONTROL

Venti's user-friendly control system provides intelligence on faults and activity; enabling the most energy-efficient operation at all times. The KTRONIC 100 touch screen controller is optionally available for the PLUS series.

REMOTE CONTROL AND CONNECTIVITY

The KTRONIC 100 electronic controller can be connected to a LAN thus allowing the compressor to be monitored and managed from a remote PC or a smartphone.

HIGH FLOW AND HIGH PRESSURE

Supplying high performance flow and pressure for modern machinery, Venti has the power and capability for the modern workshop.

KME PLUS SERIES

The KME PLUS series guarantees a compact and simple installation system with a low footprint, high power efficiency and an extended lifetime.

Benefits

- Low installation and management costs
- Total function control through a user-friendly electronic controller
- Local support
- Simplified installation
- Compact, extremely silent design
- Clean, dry air
- 3 year warranty
- Ready to run
